KATE'S STORY

Kate's film journey began with a passion for teaching the principles in *The Secret*. Without film experience, she had an intuition she would be involved in the next version of the movie. Years later, while creating her own version, she connected with the director of *The Secret* and became project manager of *Superhuman Experience*.

Today, Kate directs and produces global impact projects. She recently directed *Keep it Real*, the first film in a docuseries. Combining dynamic interviews, personal storytelling, interactive experiences, and ancient healing traditions, *Keep it Real* is designed for generational influence.
